PROFESSIONAL SUMMARY

Junior full stack developer with a technologist degree in Software Analysis and Development, currently pursuing a B.S. in Software Engineering, with nearly two years of experience on Scrum teams. I build end-to-end applications with Node.js (NestJS), Python (FastAPI), React/Next.js and PostgreSQL, backed by automated testing, Docker and CI/CD. Economist by training. English C1.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3, Java, C#
Backend: Node.js, NestJS, FastAPI, REST APIs, TypeORM, Pydantic, webhooks
Frontend: React, Next.js, Tailwind CSS, SWR, Storybook
Databases: PostgreSQL, Supabase, DuckDB, relational modeling, migrations
Testing & QA: Jest, Supertest, Playwright, pytest, Postman, functional testing
DevOps: Git/GitHub, GitHub Actions (CI/CD), Docker, Docker Compose, Vercel, Render, Azure DevOps
Data & AI: pandas, scikit-learn, LightGBM, SHAP, MLflow, dbt, LLMs / Claude Code
Methodologies: Scrum, user stories, BPMN/UML, technical documentation

PROFESSIONAL EXPERIENCE

Technical Documentation Analyst — Software Architecture & QA Sep 2025 – Jul 2026
GSE Gestión de Seguridad Electrónica S.A. · Bogotá (remote)
- Validated REST APIs with Postman and coordinated functional testing against specifications before each release.
- Automated technical document generation with Python (python-docx), reducing repetitive manual work.
- Maintained interface contracts (endpoints and data structures) and documented data and ML deployments on Kubernetes.

Software Developer Trainee — Frontend & QA Mar 2025 – Sep 2025
GSE Gestión de Seguridad Electrónica S.A. · Bogotá (remote)
- Built React components for the main application, validated in QA/PRE environments before each release.
- Wrote SQL data-validation queries and managed the backlog in Azure DevOps with Git version control.

Project Analyst May 2024 – Oct 2025
Universidad de Nariño – FACEA (School of Economics and Business) · Pasto
- Built and maintained databases of students, faculty and billing records, improving data accuracy.

PROJECTS

BNPL Support Assistant — LLM agent with RAG and tool calling github.com/JoseRomo16/bnpl-support-assistant
- LLM support agent for buy-now-pay-later shoppers: BM25 retrieval over policy documents plus tool calling (policy search, order lookup) against a FastAPI mock orders API; cites the policy section used or declines when the policies don't cover it.
- Provider-agnostic client (OpenRouter, Groq, Cerebras, Google) and an order-access check enforced in code (order ID + email).
- Built a 15-case evaluation harness; one prompt iteration raised passing cases from 5/15 to 12/15 by removing invented answers. 25 tests with pytest.

Notes App — Full stack Node.js / NestJS / Next.js ensolvers-deploy-ten.vercel.app
- REST API in Node.js + NestJS (Controller-Service-Repository, TypeORM, PostgreSQL migrations) with a Next.js, React and Tailwind SPA; deployed on Vercel, Render and Supabase.
- 24 Jest/Supertest tests, 12 Playwright E2E tests and 28 Storybook stories; CI with GitHub Actions and Docker Compose.

AutoValor CO — Used vehicle valuation in Colombia autovalor-web.onrender.com
- Full stack app in production: FastAPI service serving a LightGBM model with SHAP explanations; frontend in Next.js, TypeScript and Tailwind.
- Data pipeline (Playwright, DuckDB, dbt, Pandera) over 12,948 listings; 10.0% MAPE on cars. Docker, GitHub Actions and Render.

Personal Portfolio — Next.js 15 · React 19 · TypeScript github.com/JoseRomo16/portfolio
- Bilingual (ES/EN) static site, responsive with dark mode, built with Tailwind CSS v4 and deployed on Vercel.

EDUCATION

B.S. in Software Engineering (in progress) — Politécnico Grancolombiano 2026 – 2028
Technologist in Software Analysis and Development — SENA 2023 – 2025
B.A. in Economics — Universidad de Nariño 2018 – 2024

CERTIFICATIONS & LANGUAGES

Associate Data Engineer in SQL · Intermediate Python (DataCamp) · Container Application Deployment with Docker · AI Applied to Data Integration (SENA)
Languages: Spanish (native) · English C1 (EF SET 63/100, 2026)
