PROFESSIONAL SUMMARY

Economist and software developer building a career in data analytics, pairing a quantitative economics foundation with hands-on SQL, Power BI, and Python (pandas, scikit-learn) to turn raw data into business decisions. Practical experience managing SQL databases, building and maintaining datasets, and delivering analysis within Scrum / Azure DevOps teams. Seeking a trainee or junior Data Analyst role where an economics mindset and technical skills add value.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, Advanced Excel, Pandas, Scikit-learn, Stata, R
Programming: Python, Java, C#, JavaScript (React), HTML/CSS
Tools & DevOps: Azure DevOps, Docker, Git, CI/CD, Postman
Methods & Documentation: Scrum, BPMN/UML, REST APIs, SharePoint, ReadTheDocs

PROFESSIONAL EXPERIENCE

GSE Gestión de Seguridad Electrónica S.A. Bogotá, Colombia (Remote)
Technical Documentation Analyst — Software Architecture & QA *Sep 2025 – Jul 2026*

- Coordinated functional testing with project leads, documenting results against REST API specifications using Postman.
- Designed BPMN, class, component, and deployment diagrams as the architecture reference for the full development team.
- Maintained user manuals, service catalogs, and interface agreements in SharePoint and ReadTheDocs with full lifecycle traceability.

Trainee Software Developer — Frontend & QA *Mar 2025 – Sep 2025*

- Managed SQL databases: wrote validation queries, ensured data integrity, and generated reports for the team.
- Structured the product backlog in Azure DevOps (Epics, Features, User Stories) with clear acceptance criteria.
- Built React frontend components integrated into the main application and validated in QA/PRE environments before each release.

Universidad de Nariño San Juan de Pasto, Colombia
Project Analyst — Data Management & Educational Projects *May 2024 – Oct 2024*

- Built and maintained databases of students, faculty, and billing accounts, improving data accuracy for administrative decision-making.
- Applied quantitative analysis to administrative management within the Faculty of Economic Sciences.
- Documented educational projects and coordinated academic events within budget and schedule.

PROJECTS

Financial Asset Analysis — *Python, pandas, yfinance, Streamlit*

- Built a data pipeline and dashboard analyzing equities, ETFs, commodities, crypto, forex, and Colombian assets; automated retrieval, cleaning, and visualization of time-series data.

Colombian Job-Market Scraper — *Python, requests, pandas*

- Developed robots.txt-compliant scrapers for the ElEmpleo and Magneto365 portals, collecting and structuring listings to analyze the local data-role market.

EDUCATION

Software Engineering — Politécnico Grancolombiano *Feb 2026 – Dec 2028 (in progress)*
Technologist, Software Analysis & Development — SENA *2023 – 2025*
B.Sc. Economics — Universidad de Nariño *2018 – 2024*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Associate Data Engineer in SQL, Intermediate Python — DataCamp.
- Advanced Excel: Data Analysis & Visualization; Artificial Intelligence Applied to Data Integration.
- Application Deployment with Docker Containers; Scrum Fundamentals Certified (SFC).
